

Itron Riva 2.0 + NET2GRID Disaggregation

Maximize the value of your Itron Riva 2.0 deployment with NET2GRID's disaggregation insights to fuel value for your customers.

Utilize top-notch technical characteristics, including:

- ✓ Edge appliance disaggregation
- ✓ Customer journey includes nudges for HAN connection
- ✓ Detection of EV events, charge type and consumption
- ✓ All events available through HAN & FAN
- ✓ Solar gross production through disaggregation
- ✓ Customer Engagement as disaggregation data only or supporting a customer journey through API's
- ✓ HAN alerts, in real-time

Customer Intelligence

Generate a Digital Twin of a detailed customer & household profile to build stronger relationships, target upsells, and drive effective marketing campaigns.

Customer Engagement

Provide customers with 360 degree understanding of their energy usage and provide actionable insights to help them reduce consumption and lower bills.

Smart Distributed Energy Resources

Optimize energy costs by boosting the effectiveness of Distributed Energy Resources & provide customers with optimal time of day for EV charging.

Use cases

Tap into real-time EV edge detection to alert your business and your customers of charging events in real time, all without the need for hardware.

Generate Digital Twin household profiles for grid and customer 360 insights & provide money-saving recommendations to your customers.

Upgrade customer proposition from AMI disaggregation to real-time engagement & smart energy services using appliance-level insights via FAN & HAN WiFi.

Why choose NET2GRID's disaggregation for your Itron Riva deployment

Compatible with regional differences, regulatory constraints, & customer preferences

Access up to 90% accuracy with leading disaggregation models

Ability to process meter data of all granularities

The only EV detection app on the Itron app store (2nd version)

Over a decade of experience in hardware design & edge detection

"Consumer load disaggregation allows customers to take their energy consumption into their own hands. We are excited to collaborate with NET2GRID!"

Don Reeves
Senior Vice President,
Outcomes, Itron Inc.

"We are super excited to partner with NET2GRID as a solution provider for our DI platform. There is dramatic value to be added!"

Stefan Zschienger,
VP of Product Management,
Itron Inc.

Don't just take our word for it,
experience it for yourself
