

Backend Engineer

Location: Greece, Thessaloniki or remotely

Level: Entry / Mid

Relevant experience: 1 - 3 years

NET2GRID

NET2GRID is an AI company which empowers energy retailers to become energy transition leaders by unlocking value from smart meter data. We provide the most accurate residential energy insights and predictions thanks to our unique know-how in collecting and analyzing smart meter data of all granularities. Our clients include E.ON, EDP, EDF, ENI. We have offices in the Netherlands, in Greece and in the USA.

For this position, you will be based in Thessaloniki, Greece.

Your role

You are a Backend Engineer who focuses on building highly scalable cloud and web services. You will primarily work on backend solutions, developing real-time services and large-scale data processing. You will master cutting edge modern technologies such as AWS cloud services and develop using object-oriented languages like Python/Java/PHP/Golang.

Key responsibilities include:

- You develop, test, and maintain microservices and RESTful APIs as part of a complex cloud infrastructure.
- Build high-quality reusable code that can be used in the future.
- Design and implement software based on solution requirements.

- Use cutting edge cloud technologies to build applications.
- You oversee software from development to production.
- You are and feel responsible for your software.
- You are encouraged to speak your mind and contribute to the continuous improvement of the current infrastructure.

Who you are

A software / backend engineer who is passionate about modern cloud-based solutions. You have the ability to comprehend functional requirements and can translate those insights into scalable solutions. You cherish performance, security, and craftsmanship. You keep close tabs on IT developments and love to be a front-runner. You love working in an autonomous team. Additionally:

- Excellent level English language skills (written and spoken)
- Bachelor's degree or similar
- Excellent desktop research skills
- Proven ability to drive research and related initiatives
- 1 - 3 years relevant work experience
- Assertive and proactive attitude
- A motivated self-starter
- Empathic and communicative skills
- You are a real team player but still able to work independently
- You are able to work in an organized manner
- You can take initiatives and actively participate in shaping and improving team and company processes

Other requirements

Affinity with the retail energy sector including topics such as energy-transition or smart home
